## Eclipses 1912

There will be four eclipses in 1912, two of the Sun, and two of the Moon, as follows:

I. Partial of the Moon April 1, invisible in the U. S.

II. Central and total of the Sun April 17. The Sun will rise more or less eclipsed throughout most of the Southern, Eastern and Middle States; the eclipse will be wholly visible, but small and on the Sun's southern limb. Beginning at Boston at 5:30 mo., and ending at 7:01 mo., ends New York City 6:32 a. m.

III. Partial of the Moon Sept. 26, Moon setting as the eclipse begins at Washington, D. C. The eclipse will be small; invisible in the extreme Eastern portions of the United States. Begins, Cent. Stand. Time, 5:03 morn.

IV. Total of the Sun Oct. 10. Visible in the U. S. only as a very small eclipse on the Sun's southern limb. In the Gulf States the Sun will rise with the eclipse on. Throughout most of N. and S. Carolina the whole of the eclipse will be visible just after sunrise, but it will be extremely small—scarcely more than a contact of limbs.

## Poisons and Antidotes

Send for a physician. Induce vomiting, by tickling throat with feather or finger. Drink hot water or strong mustard and water. Swallow sweet oil or whites of eggs. *Acids are antidotes for alkalis, and vice versa.*

**ACIDS, Mineral.**—Chalk, magnesia (plaster off wall in emergency), solution carbonate of soda, emollient drinks, fixed oils. **Carbolic.**—Any soluble sulphate, such as magnesia. **Hydrocyanic.**—Fresh air and artificial respiration, with cold effusion. Ammonia by inhalation and intravenously in vein of leg.

**ACONITE.**—Emetics, stimulants, external and internal; keep up external heat, keep flat on back.

**ANTIMONY TART.**—Vegetable acids, such as tannic acid, catechu.

**ARSENIC.**—Freshly precipitated hydrated sesquioxide of iron made by adding magnesia to any iron solution.

**BELLADONNA.**—Emetics—mustard flour in water; give physostigma or pilocarpine; cold to head.

**CHLORINE WATER.**—Albumen, white of egg, milk, flour.

**CHLOROFORM.**—Fresh air, artificial respiration (inclining head down, pull tongue forward), brandy and ammonia intravenously in leg, the **HYPODERMIC** injection of 15 m. tincture of digitalis and 1-50 of a grain of atropine.

**COLCHICUM.**—Emetics, followed by demulcent drinks. If coma be present, brandy, ammonia, coffee. Opium in large dose. Keep up external heat.

**CONIUM.**—Emetics, followed by stimulants external and internal.

## Poisons and Antidotes

**CORROSIVE SUBLIMATE.**—Albumen, white of egg (4 gr. sublimate require white of one egg), flour, milk. Equal parts of lime water and milk. Emetics, or evacuate stomach by pump.

**COPPER SULPH.**—Yellow prussiate of potash or soap.

**CROTON OIL.**—Emetics; wash out stomach, followed by mucilaginous fluids containing opium.

**SILVER NITRATE.**—Solution of common salt and demulcent drinks. Emetics.

## Help in Case of Accidents

**DROWNING.**—1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's apple" back (so as to close entrance to stomach), direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. **DON'T GIVE UP!** People have been saved after **HOURS** of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give **WARM** drinks, or spirits in teaspoonfuls, fresh air, and quiet.

**BURNS AND SCALDS.**—Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil and lime-water. Shock, which is always present in severe burns, requires the administration of stimulants. Pain is more constant and intense in burns than in any other form of injury, and requires sedatives.

1. **FIRE IN A BUILDING.**—Crawl on the floor. The clearest air is the lowest in the room. Cover head with woolen wrap, wet if possible.

## Help in Case of Accidents

**SUFFOCATION FROM INHALING ILLUMINATING GAS.**—Get into the fresh air as soon as possible and lie down. Keep warm. Take ammonia—twenty drops to a tumbler of water, at frequent intervals; also, two to four drops tincture of nux vomica every hour or two for five or six hours.

**HÆMORRHAGE.**—The usual treatment is rest in the recumbent position; small pieces of ice should be freely swallowed, and the application of ice wrapped in a towel or in an ice-bag, or snow, cold water, etc., over the stomach; hot applications may be applied to the extremities.

**MAD DOG OR SNAKE-BITE.**—Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whisky, brandy, etc.

**FIRE IN ONE'S CLOTHING.**—*Don't run*—especially not downstairs or out-of-doors. Roll on carpet, or wrap in woolen rug or blanket. Keep the head down, so as not to inhale flame.

**FIRE FROM KEROSENE.**—*Don't use water*, it will spread the flames. Dirt, sand, or flour is the best extinguisher, or smother with woolen rug, table-cloth, or carpet.

**CINDERS IN THE EYE.**—Roll soft paper up like a lamp-lighter, and wet the tip to remove, or use a medicine dropper to draw it out. Rub the *other* eye.

**FAINTING.**—Place flat on back; allow fresh air, and sprinkle with water. Place head lower than rest of body.

## Business Law

Ignorance of the law excuses no one.  
Money receipt not always conclusive.  
The acts of one partner bind all the rest.  
A contract made with a minor is void in law.  
The law compels no one to do impossibilities.  
Notes bear interest only when so stated on them.

Signatures made with a lead pencil are good in law.

Contracts that are made on Sunday cannot be enforced.

Principals can be held responsible for the acts of their agents.

No consideration is sufficient in law if it be illegal in its nature.

If the time of payment of a note is not inserted it is held payable on demand.

A note obtained by fraud, or from an intoxicated person, cannot be collected.

Each individual in a partnership is responsible for the whole amount of the debts of the firm, except in cases of special partnership.

If a note is lost or stolen it does not release the maker; if the consideration for which it was given and the amount can be proven, he must pay it.

"Value received" is usually written in a note, and it should be, but is not necessary. If it is not written it is presumed by the law, or may be supplied by proof.

## Rules for Com- puting Interest

The following will be found to be excellent rules for finding the interest on any principal for any number of days. When the principal contains cents, point off four places from the right of the result to express the interest in dollars and cents. When the principal contains dollars only, point off two places.

Four per Cent.—Multiply the principal by number of days to run, and divide by 90.

Five per Cent.—Multiply by number of days, and divide by 72.

Six per Cent.—Multiply by number of days, and divide by 60.

Seven per Cent.—Multiply by number of days, and divide by 52.

Eight per Cent.—Multiply by number of days, and divide by 45.

Nine per Cent.—Multiply by number of days, and divide by 40.

Ten per Cent.—Multiply by number of days, and divide by 36.

Twelve per Cent.—Multiply by number of days, and divide by 30.

Fifteen per Cent.—Multiply by number of days, and divide by 24.

Eighteen per Cent.—Multiply by number of days, and divide by 20.

Twenty per Cent.—Multiply by number of days, and divide by 18.

Twenty-four per Cent.—Multiply by number of days, and divide by 15.
